PROJECTS

1) Sathisync Matrimonial Platform
- MERN Stack Web Application (**Link**- https://sathisync-v3.netlify.app/)
- **User Dashboard:** Dashboard, EditProfile, Preferences, MyMatches, Profile, ProfileMatch, ForgetPassword, LoginViaMobile
- **Admin Dashboard:** AdminDashboard, AddNotification, AddArticle, NotificationList, Article
- **Public Pages:**HomePage, AboutPage, BlogPage, BlogDetails, CommunityPage, ContactUs MembersPage, MembershipPage, SignUp, LogIn, MemberDetails, Policy, Logout, ErrorPage
- **Additional Features:** User Authentication, Scroll Restoration
- Admin can manage and edit user details, articles, and notifications through the dashboard.

2) ENTERTAINMENT EMPLOYMENT PROJECT
- This is basically entertainment employment project. In this project three module Admin module, Clint Module and third one is Service Provider /Artist Module. In this project Clint can post his work related to entertainment(for example requirement of band,singer,dancer,joker,arkestra) by registering himself as a clint.Now service provider also come and register himself to this website for getting jobs by giving his all skill detail means he is which type of artist(singer,dancer,joker etc) in case of service provider registration website take some money from service provider. Now after registration Clint can see that how much service provide bids on his requirement by browsing service provider on behalf of category and subcategory. If Clint gets any service provider according to his actual requirement he sealed that service provider by sending email notifications. After selecting any one service provider Clint have to pay ten percent amount of service provider cost to the website by filling one invoice form auto generated by website. After paying ten percent only.

2) PERSONAL PORTFOLIO
- **REACT JS** and **FIREBASE** are mainly used.
- This project is showcase of skills and personal project that I made during learnings . It is fully animated and responsive.
